Withdrawal of Species Restriction

Claims 1-5,9,10,16,21,29-32,34-37,41-44,46-53, 55-56, 74,96-107,113,114 and 116-130 are allowable. The restriction requirement between species, as set forth in the Office action mailed on March 22, 2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** The claims non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

Upon review of the arguments set forth in the Appeal Brief filed April 26, 2010, the Examiner decided to withdraw the rejections. As argued by the Appellant/Applicant, parachuting means dropping or sliding a significant length. In the prior art, parachuting always including dropping or sliding the valve at least the full diameter valve or blood

vessel diameter, usually much more. Therefore, the clips of the prior art are not feature that provide for parachuting as claimed. For example, Anderson et al (US 6,589,279) does not have sufficient length to provide parachuting or the other features of the independent claims; see Figures 3A thereof.

The issue of whether the claims now claim a combination of species that was not originally contemplated. Upon careful review of the specification, the Examiner concluded that cans and sutures with detents of Figures 49-56 are meant to be usable in the other embodiments because they are not meant as stand alone features but are meant to be utilized in the other embodiments disclosed. It would not make sense to treat them as stand alone features.

Colvin et al (US 6,066,160) discloses suture locking features but Colvin lacks at least the detents, digitations, or pawls located along the length of the attachment devices. For this reason, the claims are considered unanticipated and unobvious over Colvin et al.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Paul B. Prebilic whose telephone number is (571) 272-4758. He can normally be reached on 6:30-5:00 M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Isabella can be reached on 571-272-4749. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
